## **PLANTS ARE LIVING, GROWING ORGANISMS!**

They need to eat... you need to fertilize.

They need to be groomed... you need to prune.

They need to drink... you need to water.

For most of the growing season, follow these simple watering guidelines:

- Trees need WEEKLY watering & shrubs need watering TWICE WEEKLY.
- Perennials, annuals, etc. need DAILY watering.
- If unsure whether to water, dig just outside and half way down the root zone to determine the soil's moisture content or refer to our detailed care instruction sheet online at [breezyhillnursery.com](http://breezyhillnursery.com)
